

How AI will affect content creation #garyvee #shorts

The gentleman who said you inspired me in the talk just now inspiration I took some action today talked to my son this morning called him I was sorry for being a dick That's humongous Yes that's the biggest thing that the world comes out of you You know it was a really emotional thing for me That's a big deal That's why I speak for a living like that little moment But I looked at Dustin when that happened and gave him my contact and he made a note with all the technologies coming I'm not going to have to look at Dustin We're going to upload that video It's going to understand rhythms and patterns from A I of things that for me and me and Dustin in our gut are no longer going to do post production The A I is going to figure it out and put it out What is that going to mean Supply and demand issues What's going to happen is it's going to be harder to break through because everyone's going to be doing it The fact that everyone here now can buy a SASS product and make more content than I make for a fraction of that will mean that we will have more supply of content than we've ever seen before I'm not going to put my head in the sand We're going to use generative A I as well And so you're going to have to be better attention is the number one asset
