

The #1 reason your business is not growing enough #garyvee #shorts

Number one reason brother that most people here will not scale to the level that they want to is because they don't love their employees enough The real answer to the quiz is realizing you work for people not they're beholden to you because you write their check the way that employers treat employees when they have big aspirations and it's their company I'm not talking middle management and a corporation You're both in fucking jail I'm talking it's your shit and you want it to be as big as possible The two biggest mistakes people make is they invest in people like really for example I have 2000 employees I got a ton of shit going on and yet if you look at my calendar I'll show you right now Watch this tomorrow I promise you like no forget that Don't look at how many it's what it's what in these 15 minute meetings it's with employee page one on one right Charles one on 11 on 11 on 1 15 minutes 15 minutes 15 minutes You just don't fucking care about them Enough attention is the number one asset
